USER PERSONAS

User Persona 1:

Name: Daniel Rodgers
Age: 23
Occupation: Marketing Graduate

Background:
Daniel recently graduated with a degree in Marketing. He has experience with digital marketing through college projects. He's interested in social media management and content marketing but is unsure how to build a career in these fields.

Goals:

- Land a full-time role in digital marketing management.
- Create a professional portfolio showcasing his projects and campaign results.
- Improve networking skills to connect with industry professionals.

Challenges:

- Intimidated by the competitive job market and professional networking.

How FirstPath Helps:

- Provides a less stressful method of reaching out to recruiter/internship opportunities.

User Persona 2:

Name: Mary Jane

Age: 25

Occupation: Graduate Student double majoring in Finance and Computer Science with a minor in Film production.

Background: Mary Jane is an outgoing and sociable student who excels in both technical and creative fields. She's passionate about various hobbies and open to exploring new opportunities. Her interests span across different industries, as she's looking for full-time positions in acting, business analysis, or computer programming. In her free time, she acts at the Belk Theater, codes personal projects, and manages her stock market investments.

Goals:

- Secure a full-time job in one of her areas of interest.
- Update and tailor her resume for different industries.

Challenges:

- She has too many hobbies, making it hard to focus on a specific career path.
- Her resume is incomplete and needs to be targeted for different roles.

How FirstPath helps:

- Assists her in building her professional resume.
- Offers targeted networking opportunities with mentors and recruiters.

User Persona 3:

Name: Jessica Sigmon
Age: 22
Occupation: Computer Science Student

Background:
Jessica is a senior majoring in Computer Science. She has participated in coding hackathons and completed an internship in front-end development. She feels pressured to secure a job before graduation but is unsure about which area of tech to specialize in.

Goals:

- Land a software engineering job by graduation.
- Build a strong technical resume and portfolio.
- Improve technical interview and coding challenge skills.

Challenges:

- Unsure how to present her skills to recruiters.
- Overwhelmed by the many tech career paths and feels lost about which to pursue.

How FirstPath Helps:

- Provides a personalized career path in tech, offering mock coding interviews and resume-building tools.
- Offers targeted networking opportunities with mentors and recruiters in a less formal environment.
